

Maths

Addition and Subtraction

During this unit we will develop our understanding of addition and subtraction and solve related problems.

Shapes

We will look at 2D shapes including triangles, pentagons and hexagons. We will also identify the difference between squares and rectangles.

Science

Everyday materials

In science we will distinguish between an item and what it is made of. We will identify everyday materials such as wood, metal, plastic, glass and rock, describing their properties and making comparisons.

PSHE

Celebrating difference

Our lessons in this unit will help us to celebrate our differences and recognise how we can be a good friend.

Computing

In this unit we will use a painting app on the Chrome Books to draw a picture in the style of different artists. This will help us to compare the difference between painting on a computer to paper.

English

A mouse called Julian by Joe Todd-Stanton

Inspired by this heartwarming story we will study the illustrations and create a picture book.

The Story Tree by Hugh Lupton

This text will help us to develop our use of story language to write our own fictional texts.

Year 1 Autumn Term 2

PE

Our PE lessons this half term will help us to develop accuracy when dribbling and throwing a ball.

We will also combine movements to create a short dance.

French

This half term we will learn French salutations and simple classroom instructions.

Geography - What is it like here?

Thinking about our local area we will develop the use of basic geographical vocabulary and look at aerial photographs. We will also create maps and locate key features within our locality.

DT

In this popular unit we will design, make and evaluate our own Christmas biscuits. The best part will be the tasting at the end!

Music

Dance, sing and play

This half term we will recognise rhythm and pitch in music as well as finding the pulse.

RE

Human and Social Science

During this unit we will consider how celebrations can bring a community together.
